Dear Governors, Friends and Alumni,

TAU is readying for the 2021-22 school year and we will, as before, conscientiously provide for our students' academic success, safety and health. Regarding enrollment, students are voting with their feet – the overall student body is up by 1,500 compared to last year. This year we’re opening a new international study program in Cyber Politics and Government, and will soon unveil Israel’s first international online MBA.

The Jewish New Year symbolizes new beginnings: At TAU we have plans for unique multidisciplinary research, expanded international activity, increased collaboration with industry, and ever-deeper involvement in Israeli society. This is an outstanding opportunity to thank you, our TAU friends, for your cherished support in enhancing TAU and Israel's contribution to a smarter, better, safer, healthier and more just world.

Wishing you a Shana Tova,
Warmly, Ariel
Prof. Ariel Porat, President

**BIG IDEAS**

**Research: 3D Printing Takes on Brain Cancer**

Glioblastoma accounts for the majority of brain tumors and is incurable. In a world first, a TAU research team has 3D-printed a glioblastoma tumor that mimics a living cancer malignancy, providing a powerful new lab tool for testing the effectiveness of drugs and for personalizing treatment. [Watch. Read.]

**Relaunch: New David Prize Focuses on History**

The Dan David Prize, headquartered at TAU, has been redesigned as the world's largest award championing the study of the human past. Starting in 2022, the Prize will award $3 million annually to scholars and practitioners in the fields of history, archaeology, art history, anthropology and beyond. [Watch. Read.]

**Research: Man vs. Bird**

**AI Center: Pushing Boundaries**
Even before human-induced climate change, man has been responsible for mass extinctions. A TAU-Weizmann Institute study revealed that 469 bird species have become extinct over the past 50,000 years – originally due to hunting but more recently due to the destruction of the birds’ natural habitats. Read

Heritage: Revitalizing Yiddish

The Jona Goldrich Institute for Yiddish Language, Literature and Culture nurtures Yiddish scholarship along with personal family histories. Its summer program, supported since 2011 by the Naomi Prawer Kadar Foundation, has hosted 995 participants from 33 countries. Read

TAU’s AI Center unites disciplines across campus, creating new solutions for personalized medicine, the war against COVID-19, precision agriculture, digital humanities, the global justice system and more. The Center also receives support from Google’s “AI for Social Good” initiative. Read

Scholarships: Bettering the World through Music

Talented pianist and TAU music student Tom Zalmanov (pictured), recipient of the Diana Mary Steyer Scholarship for Excellence in Music Performance, believes that evoking an emotional response is the most important measure of a musician’s success. Read
